2015 - 2017

M.S in Human Centered Design
and Engineering

RECENT EXPERIENCE

Amazon | UX Designer II

03/2020 - Present | Seattle, WA

Led the end-to-end design efforts for several internal tools including a complex transportation network configuration and planning tool called Radian. Radian reduced the time required for manual network configuration by 77%, improving the configuration deployment efficiency by 40% resulting in more accurate deliveries for customers. In 4 months after launch, 750M+ packages were processed using Radian.

Led a workshop to define tenets and mission statement for our design studio, hosted a fireside chat on accessibility and co-facilitated a workshop at Conflux, Amazon's annual design conference. on using tools and techniques to improve work efficiency and mental health.

The Home Depot | Sr. UX Designer

04/2018 - 02/2020 | Atlanta, GA

Designed & shipped internal software tools and applications for The Home Depot's Fulfillment Centers that have increased the Outbound efficiency by >25% and Inbound efficiency by >100% resulting in cost savings and better online customer shopping and delivery experience.

Influenced the culture of the product and UX teams through education, empathy and strategic thinking resulting in better collaboration with the product and engineering teams.
